

Fixtop A & B Stone & Tile Setting Epoxy Adhesive

Tenax Fixtop Epoxy Adhesive is a true 100% two-part epoxy glue...not water based. Super strong! It is very easy to mix and spread. Fixtop is designed to create optimum adhesion for gluing and bonding marble, granite, stones, mosaics, porcelain and ceramics as well as hardwood, cement board, laminate and plywood. Works best when applied in a thin layer. Use to bond metal to stones, concrete to metal, ceramic to stone, stone to honeycomb panels. Does not dissolve or break down in water so it is great for shower applications and won't delaminate. No issues with expansion or contraction. Fixtop has a very smooth consistency and perfect for troweling. Tenax Fixtop has a low VOC and respects LEED parameters. For indoor and outdoor use. Colorable with Universal Pastes.

- Easy to mix
- Easy to clean up (water, lacquer thinner, acetone)
- Excellent bond to tile, laminate & plywood
- Excellent bond to granite and mosaics
- Does not dissolve or breakdown in water - great for shower applications, won't delaminate
- Allows for expansion and contraction
- Cures hard but flexible
- 100% true epoxy adhesive
