

Mastidek Fast Outdoor Cartridge Glue

Tenax Italy and Cosentino Spain have worked closely together to create a line of adhesive cartridges to work with the Dekton material.

Mastidek Fast Outdoor Cartridge Glue

Mastidek Cartridge Glue for Cosentino Dekton is a new generation bi-component resin used to glue Dekton. Dekton Mastidek Fast Outdoor Cartridge glue has a very high adhesion in a short amount of time which allows for cutting and polishing the assembled parts in a short time...approximately 45-60 minutes. The hardened product is very shiny and is very polishable.

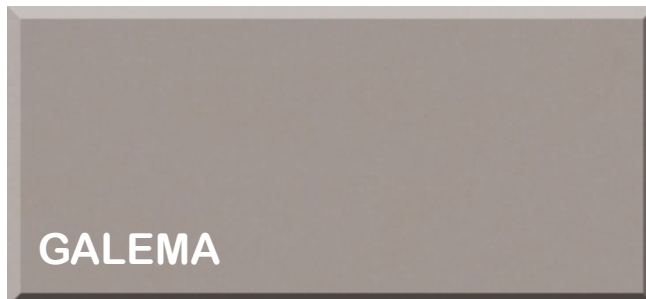

This product is produced in special cartridges with a 2:1 bi-axial quantity 215 ml. The glue and hardener are pre-dosed in the cartridge which, once inserted in the proper gun, with the special mixer fixed on top, allows the correct extrusion and mixing of the product. Requires use of special [M200XMR](#) Cartridge Gun. Suitable for outdoors.
