Safety Data Sheet

According to U.S.A. Federal Hazcom 2012

1. Identification

1.1. Product identifier

Code: GLAXSORIGINAL CAR B

Product name GLAXS ORIGINAL CARTUCCIA PARTE B

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use BICOMPONENT GLUE IN CARTRIDGE - PART B

Identified Uses Industrial Professional Consumer
ADHESIVE SYSTEM/TREATMENT FOR STONE
SECTOR

Oncome

Consumer

Cons

1.3. Details of the supplier of the safety data sheet

Name TENAX SPA
Full address Via I Maggio, 226
District and Country 37020 Vola

District and Country 37020 Volargne (VR)

Italy

msds@tenax.it

Tel. +39 045 6887593 Fax +39 045 6862456

e-mail address of the competent person responsible for the Safety Data Sheet

_ ..

Supplier: Tenax Usa

7606 Whitehall Executive Center Drive Suite 400, 28273 Charlotte NC, US

Tel. 001 7045831173 - Fax 001 7045833166

info@tenaxusa.com

1.4. Emergency telephone number

For urgent inquiries refer to Infotrac

US and Canada: 1-800-535-5053

Int'l: 1-352-323-3500 info@infotrac.net

2. Hazards identification

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in OSHA Hazard Communication Standard (HCS) (29 CFR 1910.1200). The product thus requires a safety datasheet.

Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Classification and Hazard Statement

Acute toxicity, category 4

Specific target organ toxicity - single exposure,

category 3

Skin sensitization, category 1

Hazard pictograms:

Harmful if inhaled.

May cause respiratory irritation.

May cause an allergic skin reaction.

Signal words: Warning

Hazard statements:

H332 Harmful if inhaled.

H335 May cause respiratory irritation.

TENAX SPA

GLAXS ORIGINAL CARTUCCIA PARTE B

Revision nr.2 Dated 5/5/2023 Printed on 9/20/2023 Page n. 2 / 11 Replaced revision:1 (Dated 8/17/2020)

2. Hazards identification .../>>

H317 May cause an allergic skin reaction.

Precautionary statements:

Prevention:

Avoid breathing dust / fume / gas / mist / vapours / spray. P261

P280 Wear protective gloves.

Use only outdoors or in a well-ventilated area. P271

Contaminated work clothing should not be allowed out of the workplace. P272

Response:

Call a POISON CENTER / doctor / . . . / if you feel unwell. P312 P333+P313 If skin irritation or rash occurs: Get medical advice / attention.

IF INHALED: remove person to fresh air and keep comfortable for breathing. P304+P340

P302+P352 IF ON SKIN: wash with plenty of water / . . . P363 Wash contaminated clothing before reuse.

Storage:

P403+P233 Store in a well-ventilated place. Keep container tightly closed.

P405 Store locked up.

Disposal:

P501 Dispose of contents / container according to applicable law.

2.2. Other hazards

Additional hazards

Contains isocyanates. May produce an allergic reaction.

3. Composition/information on ingredients

3.2. Mixtures

Contains:

Classification: Identification x = Conc. %

HDI oligomers, isocyanurate

 $98 \le x < 100$ Acute toxicity, category 4 H332, Specific target organ toxicity - single

exposure, category 3 H335, Skin sensitization, category 1 H317

EC 931-274-8 CAS 28182-81-2 REACH Reg. 01-2119485796-17

The full wording of hazard (H) phrases is given in section 16 of the sheet.

4. First-aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

IF INHALED

Avoid breathing mouth mouth. Use alternative systems, with preference for oxygen insufflation devices or compressed air.

If the breath is irregular or firm, practice artificial breathing and call a doctor immediately.

4.2. Most important symptoms and effects, both acute and delayed

Exposure to concentrations of solvent vapors above the professional limit can harm health, causing irritations of the mucous membranes and the respiratory tract with adverse effects on the kidneys, on the liver and on the central nervous system. The symptoms include headache, sense of instability and staggering, fatigue, muscle asthenia, state of sleepiness and in extreme loss of knowledge. Solvents can cause some of the effects supermented through skin absorption.

The contact of the liquid with the eyes can cause reversible irritation and damage.

The repeated or prolonged contact with the mixture can cause the removal of the natural fat of the skin, with consequent non-allergic dermatitis by contact and absorption through the skin. It is taken into account, where they are known, of the delayed and immediate effects, as well as the chronic effects of the components deriving from short and long -term exposure, orally and dermally, by inhalation and by

^{*} There is a batch to batch variation

TENAX SPA

Revision nr.2 Dated 5/5/2023 Printed on 9/20/2023 Page n. 3 / 11 Replaced revision:1 (Dated 8/17/2020)

4. First-aid measures .../>>

contact with the eyes.

On the basis of the properties of the components with Isocianati and considering the toxicological data on similar mixtures, this mixture can cause acute irritation and/or raising awareness of the respiratory system, with consequent condition of asthma, a frantic breath and feeling of chest oppression. Possible onset of asthma symptoms in sensitized people exposed to concentrations that are placed well below the professional exposure limit. Repeated exposure can cause chronic respiratory diseases. Repeated or prolonged contact with irritating agents can cause dermatitis

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

5. Fire-fighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

Unsuitable extinction means:

Water jet

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products.

Dangerous combustion products:

Nitrogen oxides (NOX), carbon monoxide (CO), carbon dioxide (CO2), cyanhydric acid (HCN), isocianato, pyrolysis products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

Revision nr.2 Dated 5/5/2023 Printed on 9/20/2023 Page n. 4 / 11 Replaced revision:1 (Dated 8/17/2020)

7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

Avoid any contact with water. Store at temperatures between: 5 - 35 ° C.

7.3. Specific end use(s)

Information not available

8. Exposure controls/personal protection

8.1. Control parameters

Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with current regulations.

HAND PROTECTION

Protect hands with category III work gloves.

The following should be considered when choosing work glove material (OSHA 29 CFR 1910.138): compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear. Wash body with soap and water after removing protective clothing. EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84, OSHA 29 CFR 1910.134.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

10.5. Incompatible materials

Keep away from: oxidant agents, strong alkali, strong acids, amines, alcohol, water. Exotermic reactions that are not controlled with amines and alcohol can occur.

10.6. Hazardous decomposition products

Information not available

11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Product classification derives from criteria established by the OSHA Hazard Communication Standard (HCS) (29 CFR 1910.1200), unless determined otherwise in Section 11 and 12. The data for evaluation of chemical-physical properties are reported in section 9.

Changes to previous review:
